P.U.C.

Letter No. 1039/33, dated the 8th February, 1933, from the President, Municipal Commission, Civil and Military ---- Station, Bangalore.

1

The President, Municipal Commission, states that he has disquieting information to the effect that at an advanced stage in the installation of the filteration plant, the ------ representative of the Firm expressed considerable dissatisfaction at the manner in which the work of constructing the filter beds and installing the filters, had been carried out and that he was not convinced that the water would be entirely free from possibility of contamination.

No report of this kind has been received in this ----- Residency. The Government of Mysore, may, if approved, be addressed in the matter.

2

In para 1(b) the President observes that the other point of great interest to the Municipal Commission is ------ whether the quantity of water now stored at the new reservoir is sufficient to ensure an adequate and continuous supply.

× Secy (G1)

Please see the Secretary's note dated the 12th January× 1933, in which he states that it is quite safe to say that there is now one year's supply of water impounded. If ----- approved a copy of P.U.C. may be sent to the Chief Secretary to the Government of Mysore, with the request that, if there is no objection, the information required by the Municipal Commission may be furnished to this Residency at an early date. Draft submitted for approval.

Draft to F.A. for remarks
24/3

To

The Financial Adviser to the Hon'ble the Resident, U.C

U.O.No. 2612
dated the 30th March 1933.

There are two points in the draft:

One is that the Municipal Commission is entitled to the refund of the unused balance of the deposit account as it is made up entirely of payments made by the Municipal Commission. The other is that the Military Department is not entitled to make use of any part of it for expenditure on works connected with the new "T" Scheme.

Government of India are not prepared to accept the first proposition vide their telegram dated 18th January 1933

where 1 lakh is said to be paid out of the deposit balance as an act of grace. The agreements under which the Municipal Commission paid the maintenance charges at certain fixed percentages do not appear to contain any provision as to the disposal of the surplus and the payments made would therefore belong entirely to the Government of India. The letter of the Head Quarters, Southern Command, No.4284/33 E/4 dated 30th November 1932, states the whole position clearly.

Supposing however there was to be no change in the existing water supply arrangements, the Municipal Commission might successfully have moved the Government of India to review and reduce the rates charged for maintenance. Now the position is that the deposit account has to be closed owing to the new "T" Scheme. We might argue that this contingency was not foreseen, and that Government of India should therefore consider its disposal on grounds of equity. We might suggest that as the balance is undoubtedly made up of Municipal Commission's money, it would be only fair to return the unused balance to the Municipal Commission especially as the Municipal Commission is in very bad need of funds on account of the sudden and large demand thrown on its resources by the "T" Scheme. At the same time we might point out that there is no real ground for the Military ~~Showing~~ Sharing any part of the balance, or for the use of any part of it on works not covered by the existing agreements as Government of India proposes to do.

Perhaps we need not say that if the Government of India will not pay Rs.38,000/- of the Deposit to the Municipal Commission, the Mysore Assigned Tract will have to do so, because the Resident assured the Municipal Commission that funds would be forthcoming for the meters when they were required. It would seem enough to say that Rs.38,000/- is a legitimate charge of the Military Department to be

found not from the Municipal Commission's deposit but from Central Funds.

S.N. 153 & 154.

Issued No. 2393-4 dated the 20th April, 1933.

Letter No.1838/322/E.4, dated the 18th October 1933, from Headquarters, Madras District.

In para 4 of S. N.167, the Govt. of India decided (in May 1933) that, if the Municipal Commission required money urgently for the payment of meters, the Southern Command would authorise, on the request of the Hon'ble the Resident, an advance payment of a sum of half a lakh of rupees from the Reserve Fund subject to the condition that the Municipal Commission accepted the liability to refund the whole or any portion of it that might be required for the maintenance of the existing system or for the rectification of any sudden breakdown that might occur before the new agreement was signed. In September 1933, the Govt. of India have been requested, for the reason given in para 4 of S.N.200, that they may be pleased, as a special case, to place immediately at the disposal of the President, Municipal Commission, rupees one lakh from the Reserve Fund.

Headquarters, Madras District, now request that a formal demand may be made by the Hon'ble the Resident in accordance with para 4 of the Govt. of India letter of May 1933, to enable the sum of half a lakh of rupees to be paid to the Municipal Commission. This may perhaps be

To

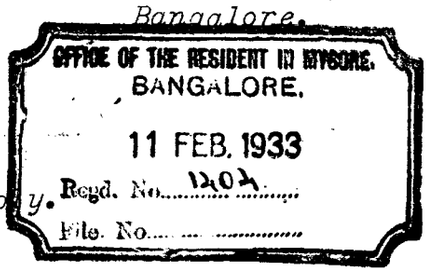
The Secretary to the Hon'ble the Resident in Mysore,
Bangalore.



SIR,

New Bangalore Water Supply.

---

1. As I understand that the new water supply will shortly come into operation, I would request that I may be informed on the two following points. -

(a) Jewell Filters. I have had disquieting information to the effect that at an advanced stage in the installation of the filtration plant, the representative of the Firm expressed considerable dissatisfaction at the manner in which the work of constructing the filter beds, and installing the filters, had been carried out, and that he was not convinced that the water would be entirely free from possibility of contamination. I should be grateful to know whether this information is correct, and if so whether the criticisms raised by the Firm's representative have been met, and whether he is now willing to certify that the installation has been completed to his entire satisfaction and is a thoroughly efficient plant. I feel justified in asking for this information considering how vital is the question of the absolute purity of the water to be supplied from the new scheme.

(b) Adequate supply. The other point of great interest to the Municipal Commission is whether the quantity of water now stored at the new reservoir is sufficient to ensure an adequate and continuous supply. I know that it is proposed to retain the "H" and "Y" tanks as a reserve in case of failure from any unforeseen cause, but I wish to be assured that there is no likelihood of the Durbar having to revert to the present sources

P.T.O.

of supply in the near future owing to inadequate storage at the new reservoir. That the reservoir will eventually contain an ample supply is ofcourse beyond doubt. I only ask for information about the quantity <u>now</u> in reserve, should the rains in the South-west monsoon fail, as they often do.

2. The possibility of a reversion to the present sources, entailing the re-introduction of a rationed supply to the Station is one which the Commission do not wish to contemplate. We will depend on our accurate records of consumption through meters for our main income under the new scheme, and meter readings can only be accurate where there is a constant supply in the distribution system. It has been proved beyond doubt that regular cessation of supply, which results in the pipes being filled with air, makes meter readings entirely unreliable. Added to this, our greatly enhanced charges for water could only be justified by a full and constant supply and a reversion to a system of rationing would undoubtedly raise a storm of indignation from the residents of the Station in view of the enhanced charges.

3. I trust that it will not be considered that I am raising these two points in order to delay unduly the introduction of the new scheme, or that I am venturing in any way to criticise unfairly the excellent work done at Thippagondanhalli. The question of purity of the water, and constant supply, are of such vital importance that I desire to be able to assure the Municipal Commission that there are no grounds for apprehension in regard to either aspect of the matter. I would refer to the note forwarded with Major Evans Gordon's letter No.3033/45-1899 dated the 26th March 1928 to the President, Municipal Commission, where, in para 8, it was definitely stated that the Municipal Commission would not be committed in any way to participate

in

in the 'T' scheme until it had been proved to the entire satisfaction of the technical experts of the Government of India to be an unqualified success.

With reference to para 3 of your letter No.1367/690-1931, dated the 22nd February 1933, I have the honour to append below the details of the expenditure proposed on meters etc., out of the total reserve fund of 1 lakh and 38 thousand:-

	Rs.
Cost of 3,000 meters complete at Rs.40/- each	1,20,000/-.
Cost of laying a 15" in diameter main from the High Ground Reservoir to Queen's Road - 2,733 R. ft., at Rs.3/- per R. ft. including removing, carting and laying pipes	8,199/-
Unforeseen items and petty alterations.	1,001/-
	Rs. 1,29,200/-
Add for another 220 meters at Rs.40/- each	8,800/-
Total	Rs. 1,38,000/-

I have the honour to be,
Sir,
Your most obedient servant,

PRESIDENT, M. C.

DIW.
4/3/33

No. 2926
690-1931.

From

The Hon'ble Lieut. Colonel Sir Richard Burke, Kt.,
Resident in Mysore.

To

The Political Secretary to the Government of India,
Foreign and Political Department.

Dated Bangalore the 14th April, 1933.

Sir,

SUBJECT: Bangalore Water Supply - Amount held in the Reserve Fund of Water Works.

I have the honour to refer to paragraph 8 of Mr. Narahari Rao's memorandum No. F.188-A/30, dated the 8th February, 1933, stating that a sum of Rs.38,000/- out of the Reserve Fund of Rs.1,38,000/- has been ear-marked to meet approximately two-thirds share of the expenditure amounting to Rs.70,000/- on account of renewals and alterations to existing pipe-works for improving the flow to the Barrack area distribution system.

2. The formation of the Reserve Fund referred to above was first sanctioned by the Government of India in the Military Department in paragraph 3 of their letter No.2812-M.W, dated the 27th September, 1897, to the Director General of Military Works. This consists of such portion of the fixed annual *contribution paid by the Municipal Commission under the existing agreements towards the estimated "Maintenance charges" of the water supply installation in the Station as have not been actually expended.

*vide Clause IV of the agreement of the 1st February, 1897, as subsequently amended between the Secretary of State and the Municipal Commission, Civil and Military Station, Bangalore.

It

It is true that the agreements under which the Municipal Commission paid the maintenance charges at certain fixed percentages do not contain any provision as to the disposal of the surplus and the payments made would therefore belong entirely to the Government of India. As the deposit account has to be closed owing to the new "T" scheme and as this contingency was not foreseen when the original agreements were entered into, I request that the Government of India may be pleased to consider its disposal on grounds of equity. As the balance is undoubtedly made up of the Municipal Commission's money, it would be only fair to return the unused balance to the Municipal Commission especially as they are urgently in need of funds on account of the sudden and large demand thrown on their resources by the "T" scheme. At the same time I would point out that there is no real ground for the Military sharing any part of the balance or for the use of any part of it on works not covered by the existing agreements.

8.14.128. 3. The Government of India, however, now propose to utilise Rs.38,000/- out of this Reserve Fund on account of renewals and alterations to existing pipe-works for improving the flow to the Barrack area distribution system. These works are being carried out entirely in connection with "T" scheme and I consider therefore that the entire cost should be met from Military funds and not from the Reserve Fund.

4. In the circumstances I recommend that the Government of India may be pleased to refund to the Municipal Commission the balance of Rs.38,000/- (rupees thirty-eight thousand) held in deposit account in addition to Rs.one lakh sanctioned in your
8.14.119. telegram No. 68-A., dated the 18th January, 1933.

5. If this is sanctioned the Commission propose to spend the whole amount of Rs.1,38,000/- as shown below:-

(a)

S.N-143.

(a)	Cost of 3220 meters complete at Rs.40/- each ...	1,28,800/-
(b)	Cost of laying a 15" in diameter main from the High Ground Reservoir to Queen's Road - 2733 R.ft. at Rs.3/- per R.ft, including removing, carting and laying pipes	8,199/-
(c)	Unforeseen items and petty alterations. ...	1,001/-
	Total	1,38,000/-

I have the honour to be,
